

CFA Radio Network

Fire Service
Country Fire Authority

CFA Radio Network

The CFA uses a multitude of repeaters across Victoria for daily operations as well as access to the SMR. All radios have had NRE frequencies programmed into them as the CFA and NRE are often fighting fires together.

:: Channel Allocation & Frequencies

The CFA have recently reflashed all there Motorola radios up to version 8 of there radio network - those changes have been reflected in the table below. Some of the things to note include lots of new IMC (Incident Management Channel) channels and dispatch channels for Country CAD.

| NO | USEAGE | LOCATION | TX FREQ | RX FREQ | CTCSS |
